INTERLACE
MEDPHARMA ERP
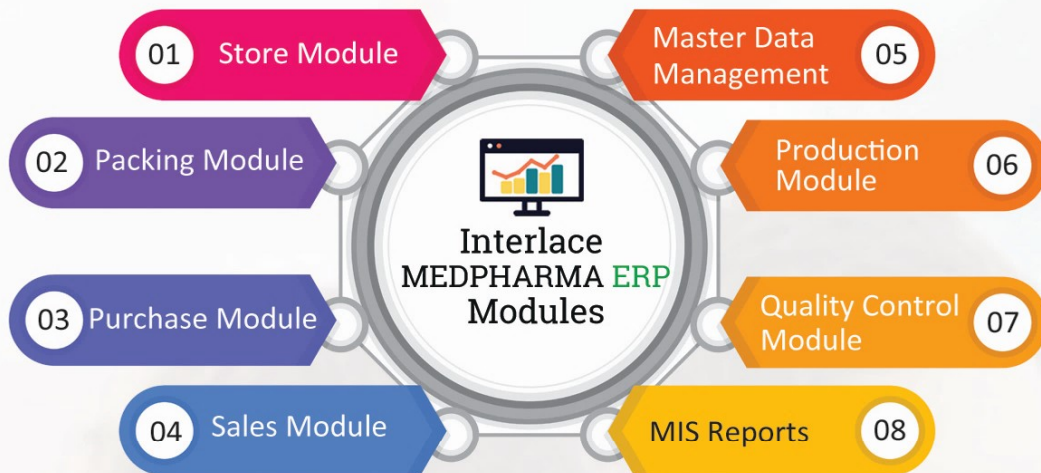

Interlace MEDPHARMA ERP

Interlace MEDPHARMA Enterprise Resource Planning System (MEDPHARMA ERP) is a customized production management software that can automate purchase, inventory, production, sales and quality control processes for the bio-pharma industries. Interlace MEDPHARMA ERP helps managers to monitor and track the stock levels, raw materials, work-in-progress, finished goods and sales efficiently.

ERP Features

Interlace MEDPHARMA ERP Modules

- 01 Store Module
- 02 Packing Module
- 03 Purchase Module
- 04 Sales Module
- 05 Master Data Management
- 06 Production Module
- 07 Quality Control Module
- 08 MIS Reports

ERP Salient Features

- An easy-to-use interface.
- Ready to use with near-zero implementation time.
- Batch and lot tracking.
- Regulations compliant.
- Quality assurance.
- Sales management.

- Real-time visibility.
- Faster revenue tracking.
- Reduced operational cost.
- Accurate inventory tracking.
- Material & inventory management.
- Purchase management.

- Completely secure and reliable.
- Designed to meet your needs.
- Efficient primary & secondary packing.
- Role-based access to critical data.

Interlace MEDPHARMA ERP Process Flow

Configure Master Data → Purchase Request → Create a purchase order → GRN / Stock-in → Stock Inspection → Stock Update

Receive Product Enquiry → Production Planning → Estimate Raw Material for Production → Stock Outward → Receipt of Raw Material at Production Bay → Production of Goods

Batch & Lot Allocation → Return of Excess Stock → Stock Inspection → Primary & secondary packing → Sale of Finished Goods

Store Module

⇒ Generate goods received note(GRN) upon receiving a stock.

⇒ Inspect received stock / raw materials & generate inspection report.

⇒ Release required stock based on production order.

⇒ Manage stock returns to vendor.

Packing Module

⇒ Primary packing.

⇒ Secondary packing.

⇒ Configurable BOM for primary & secondary packing.

⇒ Packing size is configurable according to customer requirements.

Production Module

⇒ Production planning based on available stock.

⇒ Generate production order with raw material requirements.

⇒ Receive raw materials against production order and update stock.

⇒ Return excessive production stock (Raw Material) back to store.

⇒ Convert products as finished goods based on production order with batch & lot numbers.

Purchase Module

⇒ Purchase requests from various departments to the procurement team.

⇒ Purchase order creation.

⇒ Goods receipt against the purchase order.

⇒ Purchase report.

Sales Module

- Customer Management
- Select goods for Sales
- Fetch Finished Goods from Production
- Sales Returns
- Sales Recall

Quality Control Module

⇒ Create & modify QC process.

⇒ Quality control activities for raw materials, production & finished goods.

⇒ Quality methodologies - accelerated stability, claimed shelf life, in-use stability, shipping stability, COA B1, bulk finished sampling.

Integration Module

MED PHARMA ERP can be integrated with financial software like

⇒ Tally   ⇒ SAP

Master Data Management

MDM

- Create & modify raw materials required.
- Dynamically create & manage multiple racks & locations.
- Create product names based on market requirement.
- Create & manage vendors based on approvals.
- Create & maintain a customer database.
- Configure product bill of material (BOM) based on raw material requirements.
- Configure packing bill of material (BOM) based on requirements.

MIS Reports Module

User based report

- Stock report
- Stock-in report
- Production order report
- Finished product stock report
- Low stock configuration and alerts

- List of vendors
- List of customers
- List of sales order
- MISC stock report
- Supplier evaluation reports

Deployment Options

SaaS Cloud

On-Premise
